Zhongqi Hou

Target: Overseas Technical Support Engineer (Semiconductor Equipment / Robotics · Hybrid)
Shenzhen, China | English-fluent with overseas customers | UK visa holder (~2 years)
+86 178-1676-9251 | zhongqi_hou@foxmail.com | Travel: ~3 overseas trips/year, ~1 month each

Photo

PROFESSIONAL SUMMARY

• Path: deepen overseas technical support first, then move toward overseas sales / pre-sales hybrid roles.
• Strength: independent overseas delivery (remote + Europe on-site); translate field problems into R&D-executable requirements and customer-actionable steps.
• Efficiency: use AI (Cursor) to build department knowledge systems and ticket tooling that cut timezone friction.
• Base: Automation degree + Intelligent Vehicle Lab; sensor/embedded/PCB/debug foundation for electromechanical and robotics-related equipment support.

WORK EXPERIENCE

SmartSafe (Yijian Intelligent) — Overseas Technical Support / Service Engineer Nov 2025 – Present

Automotive aftermarket inspection & maintenance equipment | Internal service engineer + external overseas technical support

• Multi-line support: wheel alignment, ADAS calibration, A/C refrigerant exchange, injector cleaning, ATF exchange, EV battery pack charge/discharge & balancing, diagnostic tablets—ramped up quickly under limited deep training.
• Field work in Spain, Netherlands, France, and Germany: after-sales troubleshooting, product training, dealer/end-user enablement.
• Key account: followed wheel-alignment HW/SW requirements for ~4 months; aligned features, interfaces, acceptance, and priorities between R&D and customer until product landed.
• Role focus: reliable at requirement clarification, issue triage, cross-team push, and expectation management across a wide portfolio.
• AI knowledge base (Cursor): FAQ + product docs, chat-style retrieval; accounts for sales/service; 24/7 on company servers to reduce after-hours document search across time zones.
• Ticket platform: case records with video/image/document upload, customer–issue linkage, and dashboard for cumulative issue visibility.

ELEGOO (Shenzhen Zhinenpai Technology) — Overseas Technical Support Engineer Aug 2025 – Oct 2025

3D printing export | Desk-based remote after-sales/technical support for EU/US customers

• Independent EU/US technical inquiries at high daily volume; built personal knowledge base + AI agent to standardize recurring issues.
• Compiled user pain points and design gaps as structured input for product and engineering teams.

EDUCATION

Zhejiang University of Science and Technology — B.E. Automation | GPA 3.04 (Top 15%) Sep 2021 – Jun 2025

CET-6 | Coursework: MCU/embedded, microcomputer principles, automatic control, C, data structures | Intelligent Vehicle Lab 3 years

PROJECTS (TECHNICAL FOUNDATION)

Inertial Navigation Off-Road Vehicle (Infineon TC264 / TC377) Dec 2022 – Aug 2023

GPS + IMU | Provincial 2nd Prize (4th in Zhejiang), National Intelligent Vehicle Competition

- Compared GPS (UART) vs IMU (SPI); fusion/complementary filtering improved real-time response and cut ~2s race time.
- Automatic task-zone logic; VOFA+ / Matlab path-error analysis and PID tuning; coordinated sensor selection and HW/SW split.

Infrared Line-Following (TI MSPM0G3507) · Vehicle ECU on µC/OS-II (STM32F103) 2024.07 – 2025.04

- IR array + MPU6050 with DMP Euler angles and yaw-drift correction; Zhejiang Electronic Design Contest Problem H (first three tasks).
- Ported µC/OS-II; ultrasonic ranging, motor deceleration, buzzer, Hall RPM display; obstacle response <50ms; PCB iteration in JLCPCB EDA.

SKILLS

Languages: CET-6 English; overseas customer conversations, on-site training, technical email.

Support: pre-sales training, after-sales diagnosis, field delivery, requirement translation, cross-timezone communication.

Engineering: STM32 / Infineon / TI; UART/SPI; RTOS basics; PCB reading, soldering, multimeter; Python / Matlab.

Productivity: Cursor / AI agents; knowledge-base building; ticket & dashboard workflows; ProcessOn / Visio / Xmind / Office.

Other: UK visa (~2 years); Shenzhen base preferred; overseas travel OK (~3×/year, ~1 month each).

HONORS

- Provincial 2nd Prize, 18th National College Student Intelligent Vehicle Competition (2023.07)
- Campus 1st Prize, Zhejiang College English Contest (2022.05) · National 3rd Prize, Puyi English Writing Contest (2023.12)
- Academic Excellence / Meiyi Corporate Scholarship (rank 7/92, 2022–2024)

SELF ASSESSMENT

Communication is the strongest asset—align facts and next actions among customers, sales, and R&D until issues close. Fast learner with a tooling mindset. Coding depth is still growing; best fit is overseas technical support / pre-sales hybrid roles in semiconductor equipment or robotics, with a medium-term path toward overseas sales in Shenzhen.
